New 2.4L Turbo Diesel Engine

Experience powerful acceleration and responsive performance with 135W power and 430N-m torque.

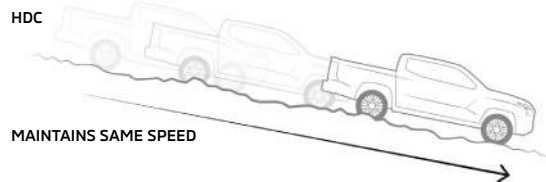

Active Stability and Traction Control (ASTC)

ASTC applies brake force whilst cornering to maintain vehicle stability and optimise traction to prevent torque loss. The system adjusts engine output and applies brake force to spinning wheels as needed.

Hill Start Assist (HSA)

HSA helps prevent rolling backward on steep slopes by maintaining braking force for up to two seconds after the brake is released. This helps ensure a safe start until the accelerator is applied.

Hill Descent Control (HDC)

HDC applies brakes and maintains speed when travelling downhill, for safer steering without manual brake application. Activates at 2-20 km/h in automatic, and in 1st gear at 3-20 km/h in manual vehicles.

9-Inch Infotainment System

Enjoy a stress-free and enjoyable time in the vehicle with the intuitive and convenient 9-inch infotainment system that comes with smartphone connectivity and an easy-to-see display.

Super Select 4WD-II

mitsubishi motors' one and only Super Select 4WD-II system provides exceptional all-terrain performance with its four selectable modes, including 4H (full-time 4WD) that delivers great stability even on wet surfaces, and outstanding cornering performance even on dry pavement.
